EXPERIMENT

# Getting real in a virtual world

*Raphaël Ferreira, Co-founder and CEO of eNovance*

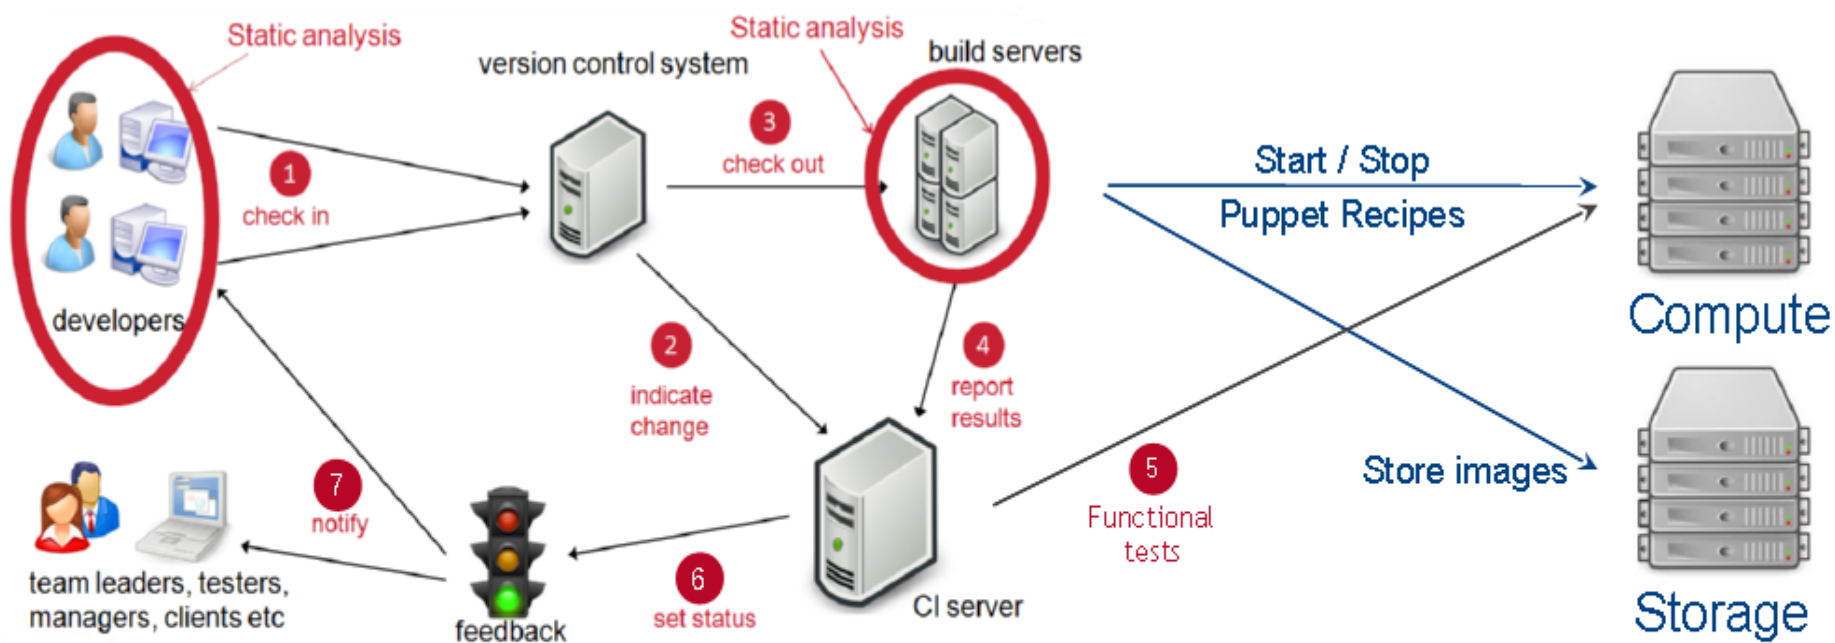

# Development & Test

Speed up development in the Cloud – Reduce Time to Market

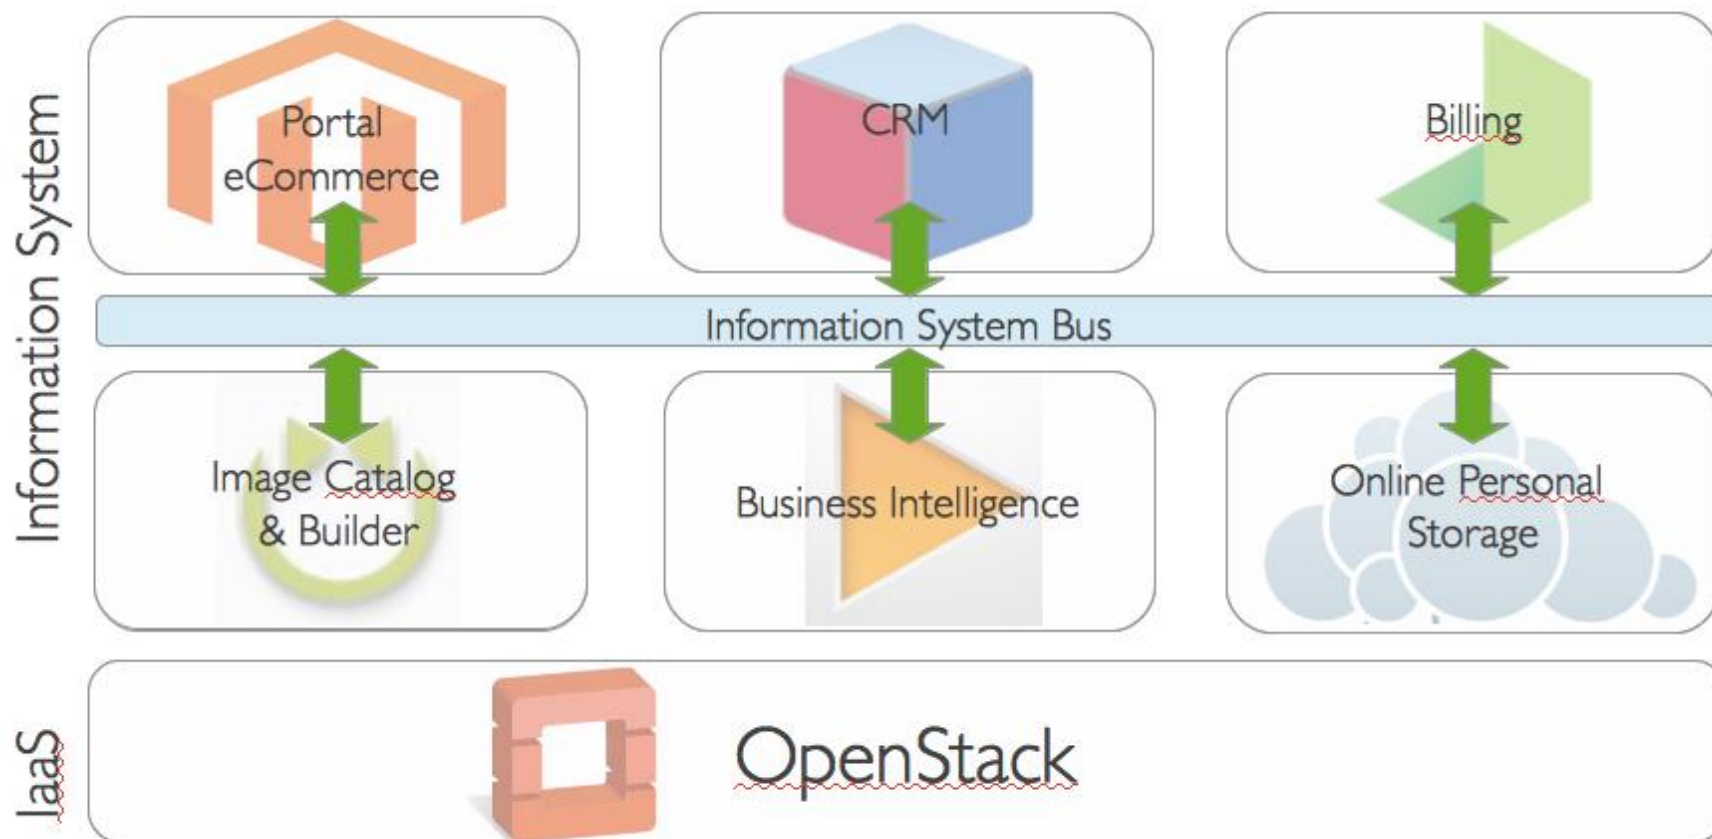

# Development & Test

## Build your Openstack Software Factory

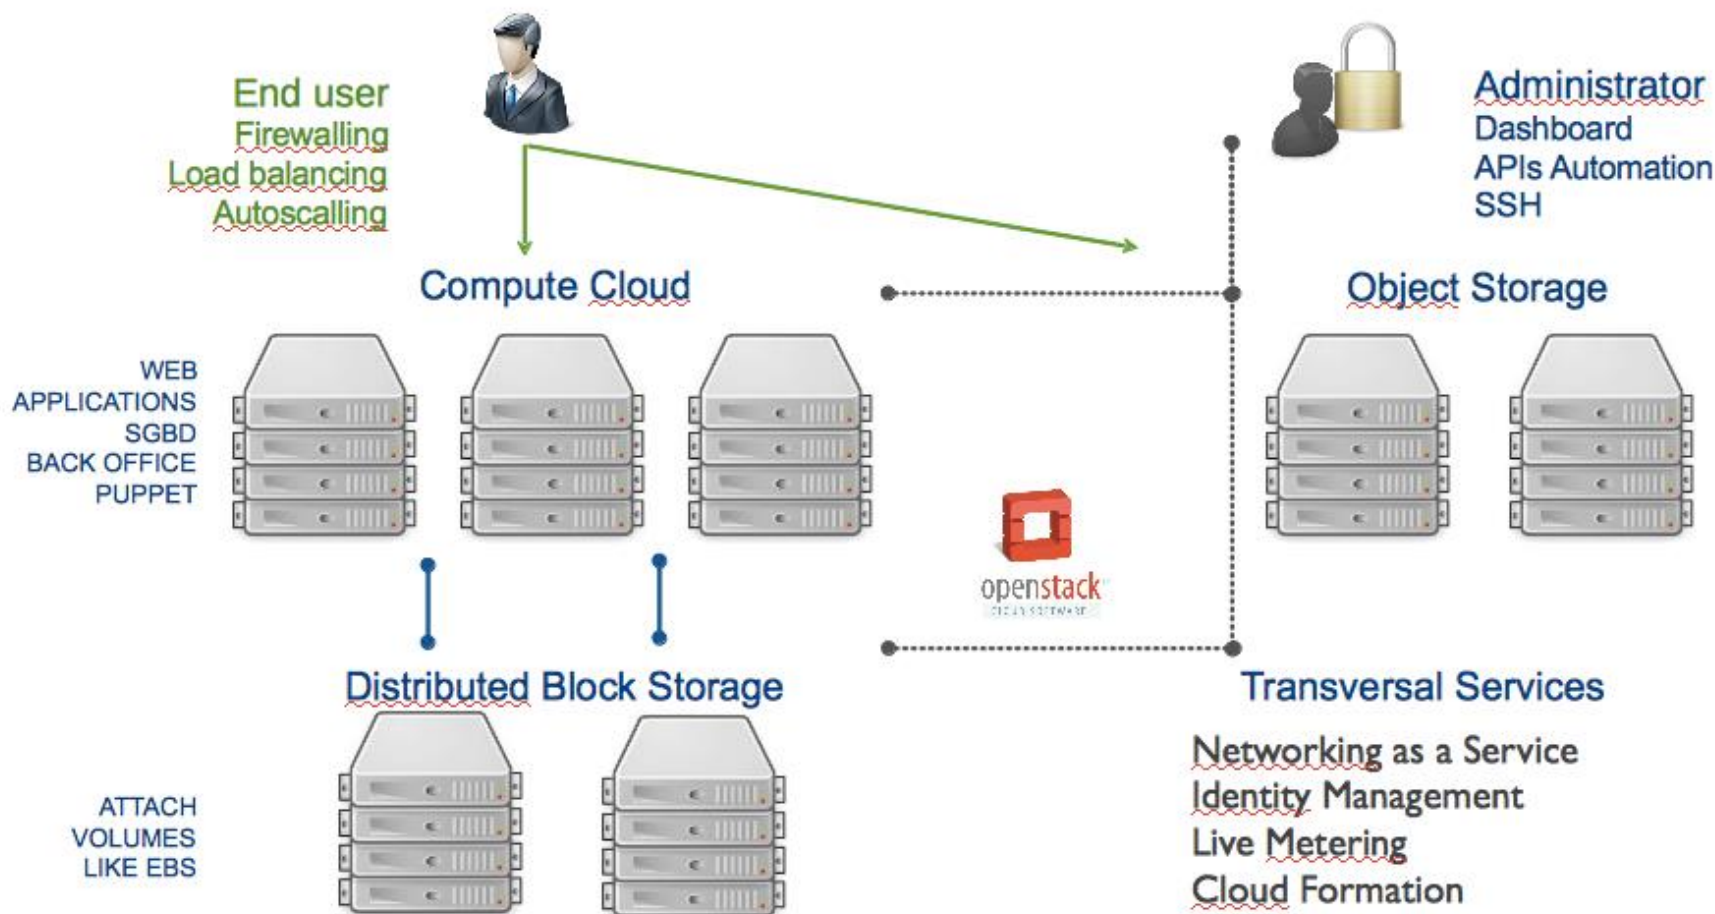

# Internal Service Provider

Build your internal Cloud Service Provider

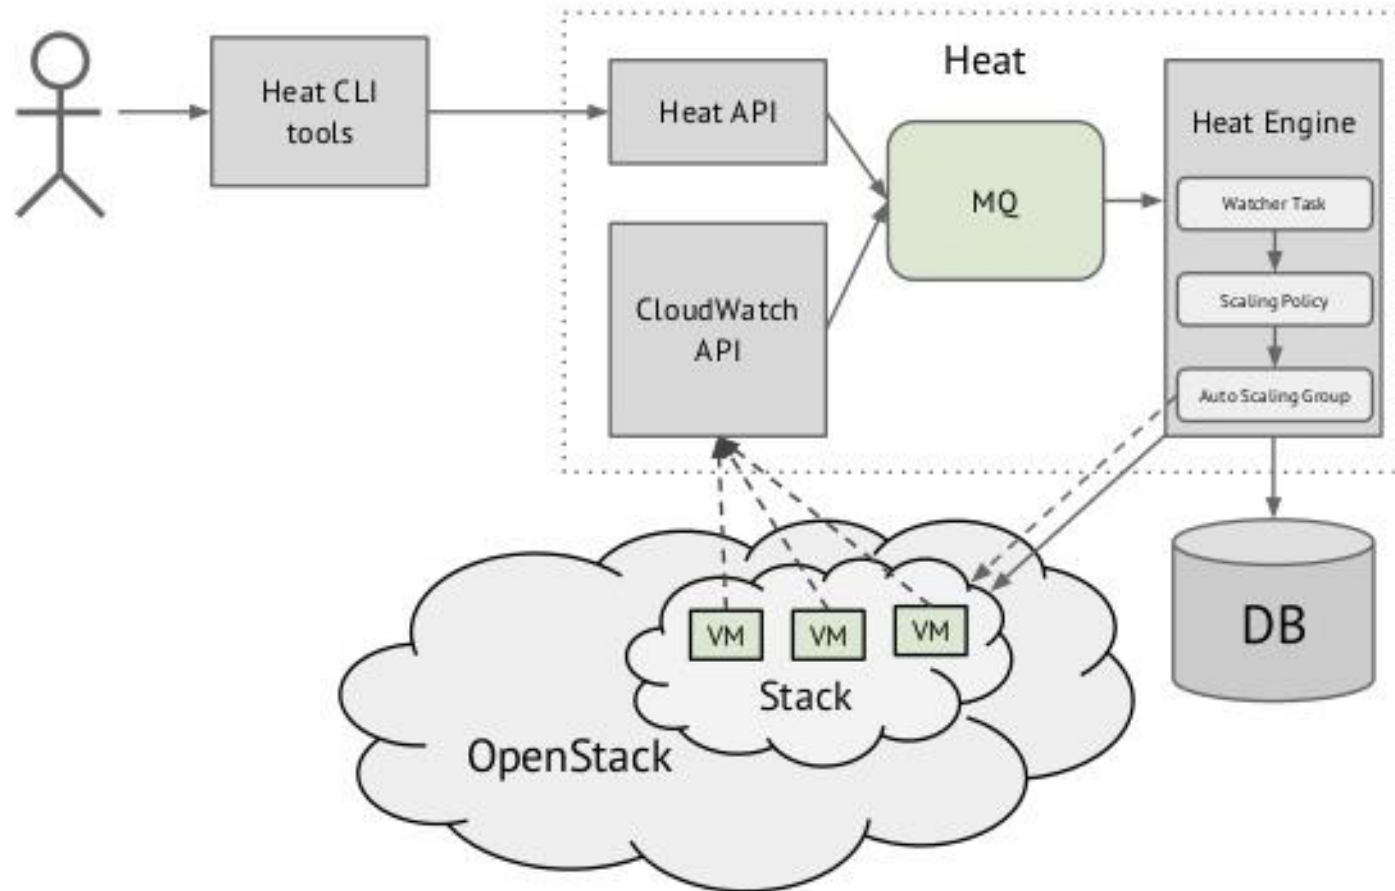

# Web & Mobile Apps

Make your application Elastic

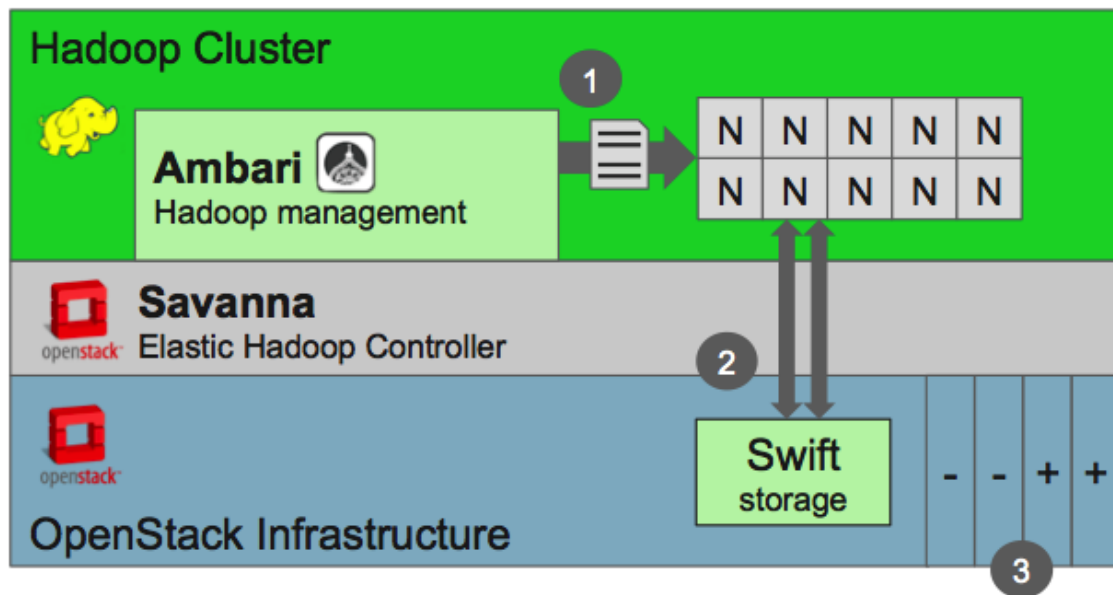

# Web & Mobile Apps

Make your application Elastic

# Big Data Analytics

Store & Process large amounts of datas

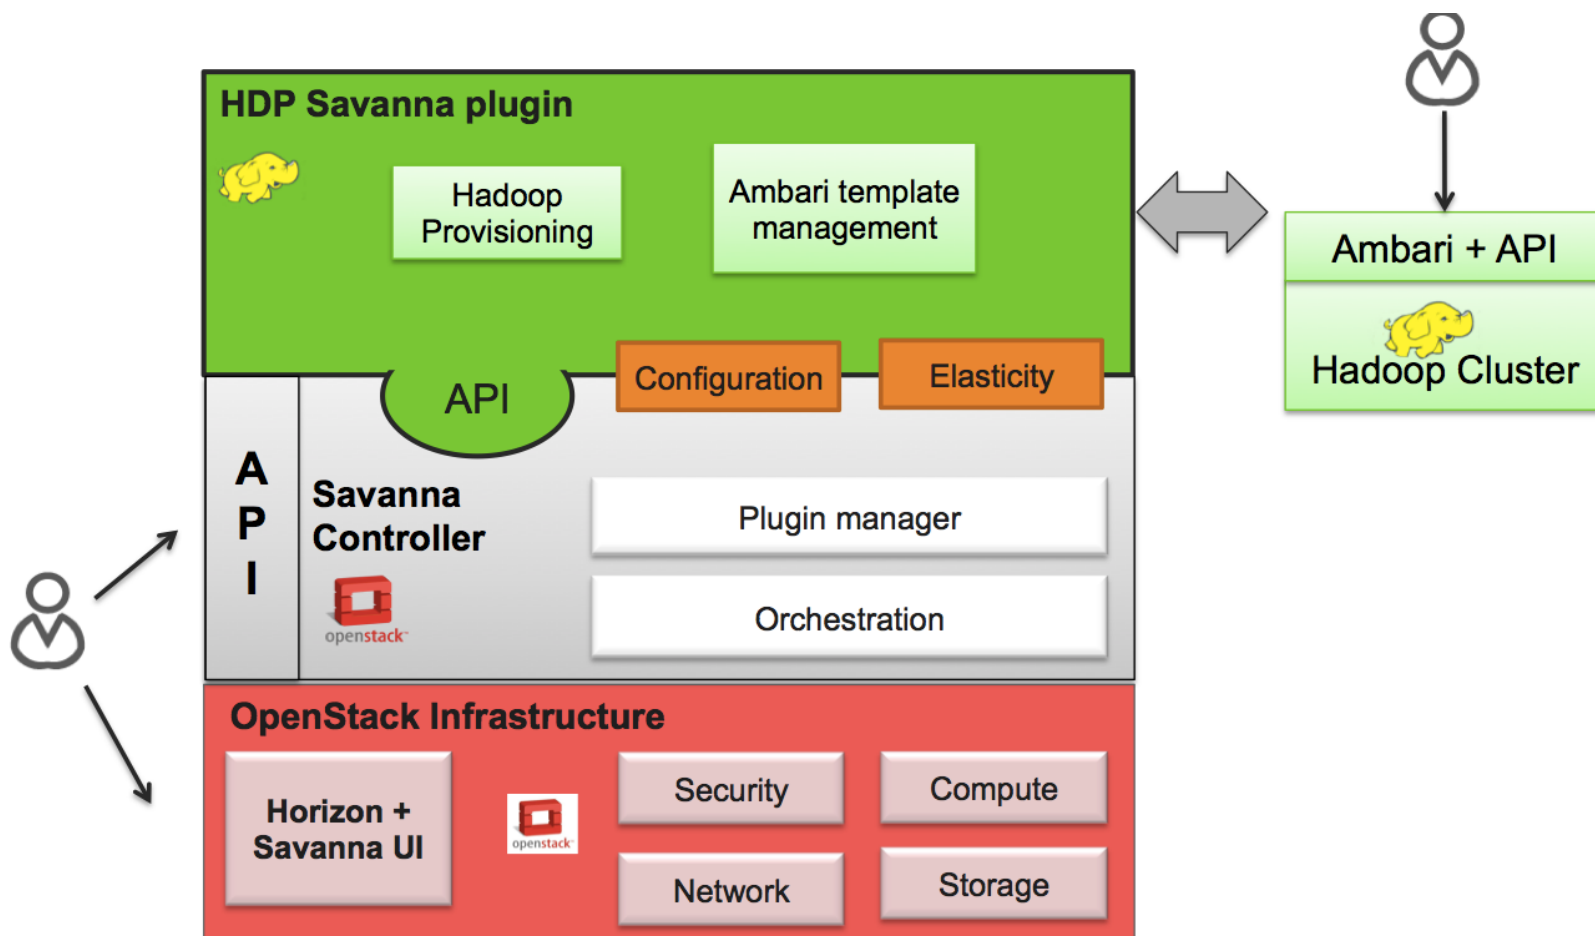

1. **Cluster templates:** deploy pre configured Hadoop clusters in seconds from Horizon or Ambari
2. **HDFS-Swift connectors:** move data between HDFS and Swift object storage
3. **Dynamic infrastructure** provides elasticity without any requisite change in cluster configuration

# Big Data Analytics

The power of Big Data and Open Cloud Infrastructure
